

## “Earth’s Resources”

### Study Guide

- People use soil to grow food.
- People use rock to make gravel for roads.
- We use plants from the rain forest to make medicine.
- Trains and cars are forms of transportation.
- A resource is something that people can use.
- A natural resource is something found in nature that people can use.
- Examples of natural resources: water, trees, soil, rocks, fruits
- Types of transportation that use water are boats, ships, barges, etc.
- Students need to be able to list a use for water besides transportation.  
(drinking, bathing, watering crops, etc.)
- We make paper from trees.
- Bricks are made from soil.
