## “All About Weather”

### Study Guide

- Weather is different everywhere.
- The four seasons are spring, summer, fall, and winter.
- Big snowstorms are called blizzards.
- Weather can cause problems.
- Students need to be able to list three types of weather. Examples: hot, warm, cold, wind, rain, snow, blizzard, sleet, hurricane, etc.
- Students need to be able to tell me 2 types of weather that they like and 2 types of weather that they do not like. They need to tell me why they like or dislike that type of weather.
